Illuminated Wooden Handrail

The Illuminated Wooden Handrail is a custom-made alternative to tread and wall lighting and is designed for all indoor residential and commercial stairways. Our standard rail is made from American Red Oak timber and can be supplied with or without an oil finish. The unfinished rail can be easily stained as required. Because we manufacture the rail to order it can also be custom made in a range of woods and profile shapes.

The mounting brackets are available for either solid wall or glass installation.

The handrail is supplied complete with the LED strip mounted inside an aluminium channel with lens.

The 316 stainless steel mounting brackets conceal the extra-low voltage power cable internally. They are attached using our innovative sliding system, and can be quickly located on the mounting points, leaving no blank spots.

The pre-wire connector simplifies installation.

- Suitable for all indoor residential or commercial applications including public and accessible routes.
- Meets New Zealand building code requirements.
- Extra Low Voltage power supply.
- 9W per metre.
- 5.1m maximum rail length.
- 19m LED maximum continuous run.
- 3 year warranty
