

# Synergy Series Receiver

**The RGBW-W-RC receiver is the heart of the Synergy Series.**

*It is compatible with all of the Synergy Series remotes to control single colour, dual colour, RGB and RGBW LEDs.*

*The WIFI-C converter receives the Wi-Fi signal from a mobile device and converts it to a radio frequency (RF) signal and sends this to the receiver. This enables the RF receiver to also be controlled via Wi-Fi by the EasyLighting app (which can be installed on IOS & Android devices)*

Suitable for both IOS and Android.  
Uses *EasyLighting* app (available free from the App Store).

## RGBW-W-RC

### Synergy Series Receiver

- 5A 4CH 12-36V DC constant voltage RF receiver.
- Updated shell with easy connection terminal without screws.
- Full compatibility with a variety of single colour, dual colour and RGB/RGBW RF remotes.
- Multiple zones can be controlled separately or synchronized with endless receivers in each zone.
- Each receiver can be controlled by a maximum of 8 different remotes.
- When working with the WIFI-C converter the receiver can be Wi-Fi controlled by using the free EasyLighting app (which can be installed on IOS & Android devices).
- Brightness of R, G, B and W can be individually adjusted to achieve millions of colours.
- Unique receiver/slave setting pin.
- Each RGBW-W-RC receiver can connect with multiple receivers
- Radio frequency available: 869.5/434/916.5MHz
