

Phillips Hue Setup Instructions

Setup:

1. Download and update the Phillips Hue app from the App store/Google Play Store on your device (phone, tablet, etc.)
2. Plug the Phillips hue hub directly into a Wi-Fi modem with the data cable provided.
Connect the hub to power.
3. Connect your device to the same Wi-Fi network the hub is connected to.
Open App.
On first use the Phillips Hue app will automatically search for a new hub.
4. Press connect on the app once it has found your hub.
When prompted push the large button on the hub once to complete the connection process.

Connecting a SMART-RC-RGBW to Phillips Hue:

1. Setup strip and Smart Home receiver, following the SMART-RC-RGBW instructions. Connect to power and turn on.
2. In Phillips Hue App
Settings (Bottom right)
Devices
Add Light (Top left)
Select Room
'No QR Code'
'Next'
'Lights and smart plugs'
'Next'
The lights connected to the receiver will flash twice to show successful pairing.
The new receiver will be added to the room.
(If no lights connect to the app please reset the receiver)

New Lights:

Once a new light has been connected change the name and icon.

1. Press the Information button on the right of the new light.
Edit name.
2. Press Icon Button
Select light type

Setting Up a Room:

1. In App
Settings
Rooms and Zones
Create
Create New Room

2. Name room e.g. Living Room
3. Select Icon
4. Select all lights in the room.
Lights when selected will flash
5. Confirm '✓' (Top right)
New Rooms will appear in the Home Page.

Home Page:

The Home Page is where all rooms are shown.
The Home Page offers basic quick functions for each room.

On/Off:

1. Press the button on the right side of the room.

Dimmer:

1. Drag the slider underneath each room to increase/decrease the brightness.
Slide right to increase.
Slide left to decrease.

For more options for each room tap on the room you would like to access.

Setting a Lights Colour:

For control of a single light in a room

1. Go into a Room.
2. Tap on a light. (for individual control)
For full colour wheel tap colour button. (see below image)
For white colour spectrum tap on the whites button. (see below image)
Warm white is at the top of the wheel.
White is in the middle.
Natural White is at the bottom.
3. Drag light tag to the wanted colour

Scenes:

A Hue Scene is a pre-set that will change all lights that are in the room, so if you set a scene all lights in that room will be changed to create the style, theme and mood of that scene.

The Phillips hue app comes with basic/general scenes.

Creating a new scene:

1. New Scene (Top left)
2. To group lights together drag one tag in the colour wheel and drop on the light you wish to pair it with.

3. To separate lights, tap once on the grouped lights and drag one away. The lights will separate.
 4. Drag the desired light tag to a colour.
 5. Tap on a light and use the dimmer slide to set the brightness.
 6. Confirm '✓' (Top right)
- You can set the colour and brightness of each individual light.
